

Alto Bell Ring Sizing

Size	Size Description
O- (TPU ONLY)	Lowers low Bb by 5-10 cents . Minimal impact on low register tone and response. (Not a good fit for most vintage Conn and Buescher altos.)
I- (TPU ONLY, Standard, conservative)	Lowers low Bb 5-10 cents . Minimal impact on low register tone and response. (Popular for the Selmer Supreme and Yanagisawa WO series altos)
II- (TPU ONLY)	Special request only. Lowers low Bb 5-10 cents . Minimal impact on low register tone and response. (Potentially good fit for vintage Conn and Buescher altos.)
O	Lowers low Bb by 10-15 cents . Minor impact on tone and response (Not a good fit for most vintage Conn and Buescher altos.)
I (Standard)	Lowers low Bb by 10-15 cents . The original alto bell ring size! Works very well for most modern altos.
II	Lowers low Bb by 10-15 cents . Slightly more effect on low range response, darker tone. (Good fit depth for most vintage Conn and Buescher altos.)
III	Lowers low Bb by 10-15 cents . Slightly more effect on low range response, darker tone.
IV	Lowers low Bb by 10-15 cents . Makes the greatest impact on low range response and warmth of sound.
O+	Special request only. Lowers low Bb by 15-25 cents . Very noticeable change in low register tone and response. (Not a good fit for most Conns and Bueschers.)
I+	Lowers low Bb by 15-25 cents . Very noticeable change in low register tone and response.
II+	Lowers low Bb by 15-25 cents . Very noticeable change in low register tone and response.
